OBJECTIVE

Dedicated PMO professional with 4+ years of experience delivering complex telecom transformations across global markets. Expert in establishing program governance, managing RAID logs, and facilitating transversal communication within SAFe and Agile environments to ensure strategic alignment and delivery excellence.

WORK EXPERIENCE

Enhancesys Innovations Ltd.

November 2021 - Present
Bangalore

Assistant Project Manager

- Led cross-functional program execution, aligning stakeholders across engineering, product, and business teams.
- PMO activities and program governance for multi-country telecom transformations in Qatar, Indonesia, Ukraine, and Algeria, ensuring consistent application of project management best practices.
- Managed multiple end-to-end software development projects using Agile & Waterfall methodologies, ensuring timely delivery and risk mitigation.
- Partnered with engineering teams to define scope, resolve technical dependencies, and optimize execution roadmaps.
- Developed structured project frameworks, risk matrices, rollout plans, and execution roadmaps, improving project predictability.
- risk management efforts by maintaining comprehensive RAID logs and program dashboards, providing key performance metrics and proactive mitigation strategies to senior stakeholders.
- Managed program-level KPIs, tracking scope, cost, and resource allocation for large-scale software solutions..

Projects -

- **Project DMS Recharge-S-NOC/Qatar(On-site)-** Spearheaded the implementation of JCM within the DMS at a major Qatar telecom operator. This initiative optimized inventory management across the entire lifecycle, from primary to tertiary sales, encompassing recharge systems, MDM, and POS devices.
- **Project- JCM- S-NOC/ ALGERIA** - Delivered a Warehouse & Dealer Management System (DMS) in collaboration with Ericsson, enhancing inventory lifecycle management.
- **Project- DMS S-NOC/ UKRAINE** - Implemented a Dealer Management System at a leading Ukrainian telecom operator. System tracks and monitors inventory and goods flow from warehouse to end customers, enhancing operational transparency and efficiency.
- **Project- DMS- MOBII/ INDONESIA** - Successfully implemented an S-NOC solution for a leading telecommunications service provider in Indonesia, enhancing inventory management, the solution streamlined Indosat's hierarchy, product management, inventory control, and sales tracking, reporting, dashboard creation, and customer engagement activities.
